

AUTOMAN ELITE

Fully Automated Sample Preparation System for LC-MS/MS

Streamline your laboratory workflow with precise, standardized and efficient sample pretreatment.

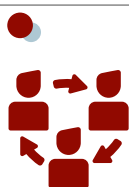

Unattended Operation

Supports walk-away automation, reduces manual intervention and improves laboratory efficiency.

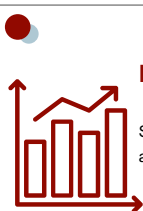

Walk-away automation

Key Advantages

Automated Workflow

Automated sample preparation for protein precipitation, liquid-liquid extraction, SPE, derivatization and other pretreatment workflows.

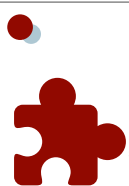

High Throughput

Supports efficient batch processing and reduces hands-on time.

Reliable Consistency

Minimizes operator-to-operator variation and improves reproducibility.

Modular Design

Integrates barcode scanning, pipetting, shaking, nitrogen evaporation, positive pressure, centrifugation, UV disinfection and ventilation modules.

Easy-to-Use Software

Intuitive programming, protocol management and process traceability.

Compact Design

Compact bench-top design, saving valuable laboratory space.

Typical Workflow

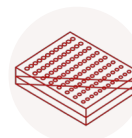

Load Samples

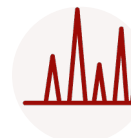

Add Reagents

PPT/LLE/SPE/SLE

Transfer / Prepare Plate

Ready for LC-MS/MS

Typical Applications

Nutrient Analysis

Steroid Hormone Analysis

Catecholamine Analysis

Therapeutic Drug Monitoring

Neurotransmitter Analysis

Other Metabolite Analysis

Designed for clinical laboratories, research institutes and central testing laboratories.

Standardize preparation. Improve efficiency.
Unlock scalable LC-MS/MS testing.
